Professional Summary

Full-stack developer finishing a degree in Computer Science at Augsburg University (May 2026), with hands-on experience building web and desktop applications. Currently interning at SureAttend, working across a Django REST Framework backend and a React/Vite frontend. Bilingual in English and Spanish.

Education & Organizations

Computer Science, Minor: Data Science

Expected graduation: May 2026

Augsburg University, Minneapolis, MN

Associates of Science in Computer Science

Completion Date: May 2024

Anoka Ramsey Community College, Coon Rapids, MN

Augsburg Coding Club, Augsburg University, Minneapolis, MN

August 2024 - Present

Skills

Technical: JavaScript | TypeScript | React | Vite | Electron | Python / Django REST Framework | Node.js |

PostgreSQL / MySQL | REST APIs | SwiftUI | R / ggplot2 | Java | Git

Languages: English (Fluent) & Spanish (Fluent)

Soft Skills: Leadership | Management | Multitasking | Critical Thinking | Continuous Self-Improvement |

Projects

Barbershop Website (Freelance, In Progress)

- Designing and building a client website for a local barber using **React** and **Vite**, incorporating real photography from the shop.
- Collaborated with a partner to manage client requirements and deliver a functional, visually driven interface.

Augsburg Meal Plans & Housing Data Visualization (Personal Project)

- Collected 12 years of Augsburg housing and meal plan data by manually pulling archived university pages via the Wayback Machine, since the site only retains the current year; analyzed and visualized results using R, ggplot2, and Quarto.
- Built dual-axis charts overlaying meal plan cost growth (+35–42% over the period) against food inflation trends to provide economic context.
- Iterated on chart design based on workshop feedback, improving color contrast and legend readability across both visualizations.

Auggie Task Manager (Academic Team Project, In Progress)

- Building a Windows/Mac desktop app for academic task management using **Electron**, **React**, **TypeScript**, and **Django REST Framework** with a **PostgreSQL** backend.
- Integrates with Moodle via iCal to automatically import assignments and apply a heuristic difficulty scoring system (0–3) for task prioritization.
- Collaborating with a 3-person team using Jira for sprint planning and GitHub for version control.

Work Experience

Sales Lead, American Freight, Coon Rapids, MN

August 2023 - November 2024

- Supervised sales and warehouse staff, ensuring team goals were met and exceeded.
- Enhanced customer experience by resolving complex issues efficiently, leveraging strong problem-solving skills.
- Increased outreach to Hispanic customers through bilingual communication, contributing to higher sales metrics.

Software Development Intern, SureAttend (Remote)

April 2025 – Present

- Served as Product Lead for the Stripe payment integration, owning the feature from RFC through implementation and documentation.
- Set up a live staging environment using **Render**, **Cloudflare**, and **GoDaddy**, including access controls so only the team could reach it for testing.
- Built backend features using **Django REST Framework**, including Calendly API endpoints, class-based views, and periodic tasks.
- Contributed to frontend updates using **React** and **Vite**, and participated in code reviews via GitHub PRs.
